

THE UNIVERSE IN MOTION

Human progress through physical and digital realms

Proceed through the past, present and future of movement, from ancient exploration to artificial intelligence.

The journey begins aboard the world's largest elevating platform, which takes you to the House of Wisdom in ninth-century Baghdad before you head on to meet nine-metre-tall historical giants of Mobility. Leap forward in time to enter a virtual world brimming with data, then step into the city of tomorrow. You may even be served by a robot or drone waiter along the way.

LEARNING OBJECTIVES:

Through '**The Universe in Motion**' journey, students will:

1. Trace and learn about the movement and progress of people, goods, and ideas within the physical and digital realms.
2. Venture across time and space to explore the dynamic universe, smart machines, and the technological link between humanity's past, present, and future.
3. Reflect on the ways through which people, goods, and ideas, move, and what it all means.

All four journeys are unique, and tailored for the different grade levels

LEVEL KG/ FS

DURATION: 2.5 HOURS

GUIDE: PROVIDED

ACCOMPANYING ADULT* TO STUDENT RATIO: 1:5

LEVEL CYCLE 1/ PRIMARY SCHOOL

DURATION: 3 HOURS

GUIDE: PROVIDED

ACCOMPANYING ADULT* TO STUDENT RATIO: 1:10
